

BEYOND HERE BE DRAGONS LYRICS

Of Love

Of love, all that's required is your moment of time
To feel yourself fly
Of love, filling your days with its magical ways
The ultimate phase
Of love, speaking in words that will never be heard
They're only inferred
Of love

Of love, taking your heart to the farthest of stars
Forget about Mars
Of love, you are as free as the wind on the sea
And that's how to be
In love, with the sun in the sky, as it pierces your eye
You let yourself fly
In love

Taking you out of the arms of despair
As light as the air
Of love, taking your mind to the heights of sublime
There is no more time
Of love, you are as free as the wind on the sea
And that's how to be
In love, in love, in love!

It Takes No Time

It takes no time to know when one is lonely
It takes no time to know when you're not home,
It takes no time to know that you're not answering your phone to me
It takes no time to know that you're not home

It takes no fool to know when love is over
It takes no fool to know that you don't care
It takes no fool to know that it's beyond repair now
And baby I ain't no fool, you know I really cared

Takin' my time gettin' over your lovin'
And I'm takin' my time gettin' over your love
Takin' my time gettin' over your lovin'
And I'm takin' my time gettin' over your love

As days go by, my life is growing shorter
As life goes on my days are growing long
And in the night, I spend the hours thinking of the time I spent with you
The time we both would call our summer song

And summer songs are meant to be sung by all the people in love
And I think I've found someone
To carry on my summer song with me again

It takes no fool to know when one is loving
It takes no fool to know when one is loved

And there's a star, hung so high, hanging up above me
And once again, I know I'm gonna ride that star

Ridin' on a star, on a wave of perfection
And I'm ridin' on a star on a wave of your love
Ridin' on a star, on a wave of perfection
And I'm ridin' on a star on a wave of your love
Ridin' on a star, on a wave of perfection
And I'm ridin' on a star on a wave of your love
Ridin' on a star, on a wave of perfection
And I'm ridin' on a star on a wave of your love
Ridin' on a star, on a wave of perfection
And I'm ridin' on a star on a wave of your love
Ridin' on a star, on a wave of perfection
And I'm ridin' on a star on a wave of your love
Ridin' on a star, on a wave of perfection
And I'm ridin' on a star on a wave of your love
Ridin' on a star, on a wave of perfection
And I'm ridin' on a star on a wave of your love

Share The Wealth

Who do you think you're foolin' Ronnie
Foolin' around with our lives
Makin' us kill our minds and souls
To keep our children alive
You keep on buildin' your superbombs
That'll kill off half the Earth
Money is the reason that the world exists
For human life has no more worth

Now is the time to share the wealth,
Now is the time to help ourselves survive
Now is the time to share the wealth,
Now is the time to help ourselves survive

You better face it the bank don't care
You're a number in their eyes
All the smilin' faces on TV, are nothin' but hype and lies
The Arabs don't have nothin' to do with the prices that hit the sky
It's because of the sacred cow, big business
And the man in the suit and tie

Now is the time to share the wealth,
Now is the time to help ourselves survive
Now is the time to share the wealth,
Now is the time to help ourselves survive

Tell me now Franklin, are you comin' to your senses
In the darkest of night
Four point five billion in the world as of this morning
We will double in our might
Livin' in a bar and grill
With false hopes in a magic pill
That's takin' you out on your flight
Have you read your story in the paper this morning
You were not treated right

Not all of us want to be chairman of the board
Not all of us want to be kings
Most of us just want to live our lives
'Cause our love isn't made of things
None of us are going to live forever
But our children have to go on
Make human life more precious than gold
And I'll know that you heard this song

Now is the time to share the wealth,
Now is the time to help ourselves survive
Now is the time to share the wealth,
Now is the time to help ourselves survive
Now is the time to share the wealth,
Now is the time to help ourselves survive
Now is the time to share the wealth,
Now is the time to help ourselves survive
Now is the time to share the wealth,
Now is the time to help ourselves survive
Now is the time to share the wealth,
Now is the time to help ourselves survive

Wind Of Angels

The wind of the angels is taken for granted
The song of the gods is not heard anymore
We push and we shove and we rake in the money
But there ain't no more light with your face in the floor

Do you believe in the God of the dollar?
Or do you believe of a God in the sun?
Or do you believe in this rock n' roll thunder?
The ten thousand visions are really just one

Where is your anger and where is your power?
How hard will you fight in your drive to survive?
Make up your mind and you'll make some decisions
You'll do it because you are clear and alive

Don't give up hope in the face of insanity
Keep up the faith in the cruel eyes of greed
We are the people and we are the power
We change the world in the way that we need

Discoveries

I'm discovering the woman inside the girl
With all her claws and laws, 'bout how to live in this world
She wants it open and she wants to keep it on the line
To clear the skies of lies, to bear the fruit on the vine

Yet, she stares out the window at nothing particular
What's in her mind?
Is it the thought of the future, and how they will use her
To let her climb

Or maybe she is thinking of another way she'd rather be spending
Her time

I'm discovering the woman inside the girl
With all her smiles and wiles, she disappears in a whirl
Where does she go when she's alone
And she's desirous of a real good time
And it's so real to feel, but she may never be mine

Cause she stares out the window at nothing particular
What's in her mind?
Is it the thought of the future, and how they will use her
To let her climb
Or maybe she is thinking of another way she'd rather be spending
Her time

I'm discovering the woman inside the girl
I'm discovering the woman inside the girl
I'm discovering the woman inside the girl
I'm discovering the woman inside the girl

I'm discovering the woman inside the girl
While she is free to be, I'd like her safe and unfurled
She walks the pathways of a primal set of rules
That keep us all in a bind
But in the heart of my art
She will always be mine

But she stares out the window at nothing particular
What's in her mind?
Is it the thought of the future, and how they will use her
To let her climb
Or maybe she is thinking of another way she'd rather be spending
Her time

I'm discovering the woman inside the girl
I'm discovering the woman inside the girl
I'm discovering the woman inside the girl
I'm discovering the woman inside the girl

Sands Of Time

And all at once the things you knew
Have all begun to come so true
They come into your life just like a dream
Some say dreams take place at night
I don't believe that's exactly right
I think it all depends upon your view of things that come and go
Like lullabies and fallen snow
And lovers all throughout the lands
That walk along the beaches of the shining sands of time

The lullabies of love are pearls
That fill your heart with crystal swirls
They're going hand in hand to shape your dreams

And some say dreams are not so real
It all depends on what you feel
I think it all depends upon your view of things that come and go
Like lullabies and fallen snow
And lovers all throughout the lands
That walk along the beaches of the glistening sands of time

Love's a lullaby
Like a melody that comes and goes
Through your mind
Love's a lullaby
Like a melody that comes and goes

So when you're lonely in your heart
You bet your life you'd better start
To make the world a place that's in your dreams
For dreams can be of pastel shades
Or rolling clouds that hide your gaze
They seem to have the means to shape your view of things
That come and go, like lullabies and fallen snow
And lovers all throughout the lands
That walk along the beaches of the shining sands of time

Love's a lullaby
Like a melody that comes and goes
Love's a lullaby
Like a melody that comes and goes
Through your mind
Love's a lullaby
Like a melody that comes and goes
Through your mind

Moments

When your world around you crumbles
And you know you're going mad
And everyone around you
Tries to say it's not so bad
But your eyes are seeing clearly
What your mind cannot accept
And the visions start to plague you
Once again

The visions of the future
The delusions you have felt
And the soul destroying sorrow
That has split your heart aleft
And there's no one left to turn to
And there's no one left to hold
And there's no one left to love
That includes yourself

So you go out to the basics
To the wind or the sea or the sky
And you've got the strength and you sense the love

But you don't know the reason why
And you torture yourself silly
With your head held in your hands
And you make some sort of peace
That lasts awhile

But by God there's an answer
And it rests inside us all
If we take the time to suffer
Through the endless painful call
For life consists of suffering
And life is made of pain
And if you do not know what happiness is
It's moments

The moments of a feeling
The moments of a glance
The moments that we try to hold
In our hearts and in our hands
And the moments made by anger
And the moments made by awe
But The moments made of wonder
Count the most

So you have your choice of living
And you have your choice of death
And you have your choice of love or hate, but it's you the makes the rest
And you have your sphere of being
In the circle of your lives
And I know that you will find your ways
To peace
To peace
To peace
To peace

Circles

People keep talkin' bout money and problems in their lives
Puttin' other people down behind their back, they gotta criticize
Hardly ever get a chance to say that we are much obliged
Cause we're going in a circle babe
And nobody really knows where the circle begins

Singular methods of keepin' you into your self despise
What you gonna buy when the well runs dry
You know what that implies
All of us sittin' round wonderin' are they tellin' us lies?
If they are, then we're in trouble
And now everybody better think about where this ends

Hurtin' people gotta keep workin' it just to stay alive
Two weeks in the sun is not a lot of fun, and I apologize
'Spect a bunch of people now agree that they all sympathize
Cause the rich keep gettin' richer
And the poor had better think about where that's at

Makin' your life a misery ain't never gonna satisfy
If you keep thinkin' that you're gonna be sinkin'
Then everybody say goodbye
Keepin' your humanity full of common dignity
Now that's the one that justifies
Cause we're only simple people babe
And nobody really knows
And we're going in a circle babe
And nobody knows where the circle begins
