

SHAWN PHILLIPS – SPACED LYRICS

Rant

Got up in the morning in the drizzlin' rain
Walked into a cafe down in old south main
Lady was alone in a corner booth
Lady was a loner and a lookin' for truth
Lady, what's the matter are you lonely?
Really doesn't matter if you're homely
Someone gonna love you if you want it
Someone gonna hold you if you flaunt it
Lady what can I say to you?
Lady I wanna make love with you
Lady I will be near you now

What you gonna do with an irate lady?
What you gonna do when she gets uptight?
Where you gonna go to find a remedy?
How are you gonna lure her back tonight?
Bat eyes, cats' tails make a potion
Luminous green complexion lotion
Tell her put it on when she's got a notion
She will follow you over land and ocean

Lady what can I say to you?
Everything is turning out right
Lady what can I say to you?
Everything is turning out right
Lady what can I say to you?
Won't you please come back tonight?
Lady what can I say to you?
Won't you please come light my light again?

Mama there's tomorrow yeah
Tomorrow gonna bring no sorrow
Fill your heart with laughter
'Cause it really didn't even matter
Concentration daytime yeah, space out every night
Fill your life with love every minute and the world gonna treat you right

I say lady what can I say to you?
Lady I wanna make love with you
Lady I will be with you now

The Light From Between Your Eyes

In the dark of all that's happened
By the light from between your eyes
The world has now become illumined
The wailing's not a great surprise
The passing of a state of being
The shadow of a knowing smile
A flicker of the fate await us all the while
To the spaces of a testy nation

Incessant in its search for force
I cancel all my obligations
Refusing to remount the horse
Benthamism could be valid
For those who cannot feel the source
There's got to be a simpler way to set our course
Sifting through the minds that guide us
There's very little to be found
But avarice and insurrection
Making yet another round
Cynicism isn't something you really want to toss about
A life is truly worth a lot more than we're taught NOW
But finally we will see a clearing
Of hyaline dimension set
Solution in the myth of oneness
Dreamers all around us yet
Signal to the empty essence
Urging not to take too long
Time is of the utmost importance but we're so strong

Stranded

Scorpio has their day
When the moon is a quarter you can clearly see the milky way
She took me in her arms to say
That life is just as hard for the people who are getting their way
Waiting for the judgment day
We will be ready
We will go without a moment's delay
Going away
Don't want to stay stranded, stranded, stranded, stranded
Breaking through a wall of pain
From the birth to the memory
Life is not to be profaned
Sometimes it can be so gray
But when the wind starts to howl it will usually blow it all away
Coming from another plane
From the night to the light that lets you see the morning rain
Feeling no pain
Walking in sugar cane
I'm not stranded
Living a dream
Stranded
You know what I mean
Stranded
Take it apart
Stranded
I'm winning your heart
Standing on a castle wall
Looking at the hour being eaten by the powerful throng
Have you ever lived in war
If you kae your life for granted it will leave you stranded
But peace is on its fragile way
From the night to the light that lets us go our trembling way
Feeling no pain

Walking in sugar cane
Feeling no pain
And we are not stranded
Living a dream
Stranded
You know what I mean
I said stranded

From All Of Us

Woke me up this mornin' and the light was pourin' down
A million tiny suns on the sea below the town
Mountain growin' high in the sky before my eyes
People movin' 'round and I can hear the babies' cries

Got a lotta living all of us, 'cause that's all there is to do
Got a lotta love in all of us, I think you know it's true
Got a lotta lovin', I wanna make love with you

As I look towards the distant line that I can see
A storm is passing by the clouds are ridin' high and free
I hear the far off thunder and I see the slanting rain
The lightning forming visions on the vast and moving main

But it's going away from where we are
But it'll come another day
Goin' away from where we are
But when it comes we'll know the way
Goin' away from where we are today, NOW

This very moment we got the time and we got the space
Everybody knows that this is the place
This is the place that we got to face
I think you do intend to leave your trace
And if you do intend to help yourself
I'll do everything I can to help
Call me I'm going by
From all of us to all of you, we give you merry cheer
We try to bring you hope in every year
And everything is going back to where it all began
All returning to the mind of man
People bein' people as we are
We could love without the fear
People bein' people as we are
We keep it up from year to year
People bein' people gonna from there to here
